ROADPLATES - BARE STEEL SMOOTH TOP - SKATE PLATE

2.5m x 1.25m x 12mm (8ft x 4ft x 1/2 inch) – Steel

ST-250X125X12

Skating, rolling and moving large and very heavy loads is always a challenge. Poor and worn finish on concrete floors, unmade ground, inclines, cambers and unquantified subterranean conditions can make it even more so.

Invariably ducts, drains, fibre optics and culverts lay criss cross under most factories, docks, hospitals and manufacturing plants. Damaging them is not an option.

That's why we provide 'smooth topped/skating plates' in a cross section of sizes and thicknesses. Suitable for machinery skates, caterpillar skates, plant rollers and air skates.

TECHNICAL SPECIFICATION

TYPICAL APPLICATIONS:

Will bridge a trench or void up to 400 mm wide for highway traffic loadings and similar masses

Ideal for skating/rolling heavier loads across terrain that is hard but not smooth.

Suitable for traversing with lighter steel tracked machinery

As with all roadplates/crossing plates, the loadings for whatever passes over them will be transferred to the areas bearing the edges of the plate. Adequate measures to shore the underlying substrate should be taken

MASS: 300 kgs

MECHANICAL HANDLING: Yes. Suitable forklift or overhead lifting arrangement

SALLY VERSION: Currently only on request (see our 20 mm that have them as standard)

ANTI SKID: N/A - Natural finish

SECURING METHOD: Nominally drilled 11 mm dia holes in corners for Plate pins, In-dex screws or similar
