ROADPLATES - BARE STEEL SMOOTH TOP - SKATE PLATE

6m x 3m x 25mm – Steel C/W SALLY

ST-600X300X25

Skating, rolling and moving large and very heavy loads is always a challenge. Poor and worn finish on concrete floors, unmade ground, inclines, cambers and unquantified subterranean conditions can make it even more so.

Invariably ducts, drains, fibre optics and culverts lay criss cross under most factories, docks, hospitals and manufacturing plants. Damaging them is not an option.

That's why we provide 'smooth topped/skating plates' in a cross section of sizes and thicknesses. Suitable for machinery skates, caterpillar skates, plant rollers and air skates.

TECHNICAL SPECIFICATION

TYPICAL APPLICATIONS:

To traverse excavations up to 1700 mm wide for light/medium traffic and similar masses

To cover trench up to 1,400 mm wide for trucks, heavy construction plant, cranes and forklifts

Good for skating and rolling heavier loads across problematic terrain

Suitable for traversing with steel tracked machinery

Of an adequate thickness to form outrigger/stabiliser pads for plant.

Also used for covering areas (block paved, tarmac & non reinforced concrete) for heavier traffic such as trucks, cranes & machinery

Square edge versions available subject to stock.

As with all roadplates/crossing plates, the loadings for whatever passes over them will be transferred to the areas bearing the edges of the plate. Adequate measures to shore the underlying substrate should be taken

Individually serial numbered for tracking purposes

MASS: 3600 kgs

MECHANICAL HANDLING: Yes. Suitable forklift or overhead lifting arrangement

SALLY VERSION: Yes, 2 x plus spreader beam

ANTI SKID: N/A - Natural finish

SECURING METHOD: *Available with counterbored holes for M18 ANKERBOLTS or similar
